KENWOOD VHF/UHF MICROWAVE Band Plan

Listen to the Future

EXTRA • ADVANCED • GENERAL • TECHNICIAN

NOVICE RESTRICTED AS INDICATED

BANDWIDTH
XW = 6MHz + BW
W = 1MHz BW
M = 100kHz BW
N = 50kHz BW

AM - Amplitude Modulation
ATV - Amateur Television
BCNS - Automatic Propagation Transmitter (Beacon)
CW - Morse Code
Data - packet, RTTY, AmTOR
DX - Distant station contacts (longer range than usual)
FM - Frequency Modulation
FM Links - FM relay from one repeater to another
FM Repeaters - FM relay stations

FM Simplex - FM direct contacts
Link - relay stations for data & voice
Phone DX - long distance voice transmission
Point to Point Data - automatic packet radio transfer stations
*R/C - radio control models
RPT/IN - your transmit frequency to a repeater
RPT/OUT - output side of FM repeaters
SATS - Satellite & Space Shuttle Communication
Space - Satellite Operation

Space Telecommand - uplinks to control satellites
SS - Spread Spectrum
SSB - Single Sideband Weak-Signal Work
SSB/CW - both Sideband & Morse Code
SSTV - slow scan TV
Wide Band FM - television audio
Wide Band - FM, AM, Spread Spectrum, Television
